

# Smart Investments for City and County Managers: Energy, Environment, and Community Development

*Smart Investments  
for City and  
County Managers:  
Energy, Environment, and  
Community Development*

Urban and Economic Development Division  
U.S. Environmental Protection Agency  
Washington, DC 20460

---

**T**his Guide was compiled using information from a wide range of sources, including published and unpublished documents, Internet sites, and personal communications with numerous federal, state and local government representatives. In documenting these sources, a conscious effort was made to strike a balance between the standards of documentation normally applied to more technical reports and the desire to maintain the flow and readability of the text in a resource guide intended for a more general audience. In general, specific notations are provided here for written sources that may prove most useful for readers wishing to obtain more detail on individual programs or case studies; where the information in the Guide was based largely on personal communications, appropriate contacts for additional information have been listed at the end of each chapter.
